

Usability Report

Project: Siemens EDA – SDET Technical Task – Task 1

Feature: As a user, I can navigate through the website and see expected content

Tester: Nagy Raouf

Date: August 9, 2025

Test Environment: Chrome 139.0.7258.6, Windows 11

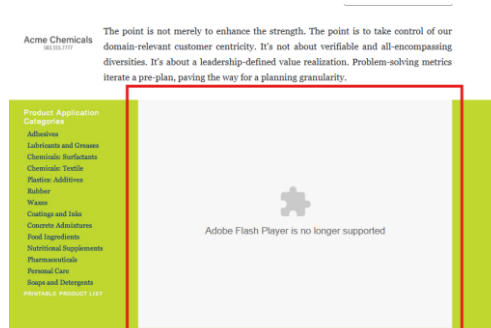

U-01: Unsupported Plugin

Description: Homepage shows “Adobe Flash Player is no longer supported” instead of image.

Recommendation: Replace outdated plugin with HTML5-compatible element.

Priority: High

Screenshot:

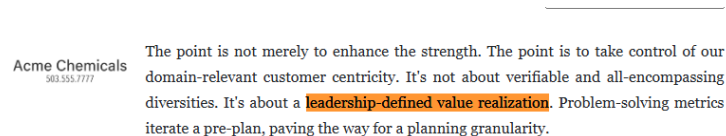

U-02: Confusing or Meaningless Jargon in Text

Description: The site contains unclear terminology such as “leadership-defined value realization” and “planning granularity.”

Recommendation: Replace technical or vague jargon with clear, user-friendly language.

Priority: Medium

Screenshot:

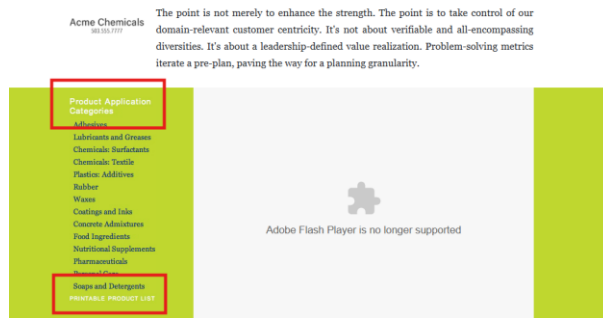

U-03: Poor Visual Contrast in Some Text Areas

Description: Some sections have insufficient contrast between text and background, making content hard to read.

Recommendation: Adjust color schemes to meet WCAG accessibility contrast guidelines.

Priority: High

Screenshot:

U-04: Lack of Visual Hierarchy

Description: The page does not clearly differentiate headings, subheadings, body, and navigation text. Users may struggle to scan or understand the page structure.

Recommendation: Apply consistent typography styles to establish a clear content hierarchy.

Priority: Medium

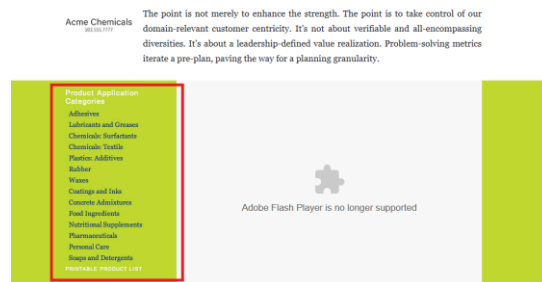

U-05: Sidebar Accessibility Issues

Description: The left-side product category list has no keyboard or screen reader accessibility indicators.

Recommendation: Add ARIA labels, focus indicators, and ensure full keyboard navigation support.

Priority: High

Screenshot:

U-06: Broken or Unclear Search Field

Description: The search field at the top right lacks a visible “Search” button and the users might be unsure how to initiate a search.

Recommendation: Add a clearly labeled or icon-based search button.

Priority: High
